Experience

Senior Back End Developer

Gamzix, 2022-now

Description: Designing a complex and high-performance microservices architecture, decomposing monolithic systems, optimizing and enhancing database structures, resolving complex business issues, demonstrating team leadership and management skills.

BackEnd: Node.js, Nest.js, RabbitMQ, DLX, Typescript, WS, WSS, REST API, MVC, SOLID, Saga orchestration, ACID.

DB: PostgreSQL, Redis, OpenSearch, ELK, Grafana, Prometheus.

Cloud: AWS (S3, EC2, OpenSearch)

Strong Middle Fullstack developer

Temabit (Fozzy group), 2021-2022

Description: Developing and supporting cash register software for one of the biggest retail shops, designing post service software for the third-largest postal service in Ukraine, and collaborating on an AI-based project in the food domain.

FrontEnd: Vue, Vuex, electron, cordova.

BackEnd: Node.js, Qt, WS, WSS, WebRTC, REST API, C#, MVC, SOLID, PostgreSQL.

Middle Fullstack developer

Yellow Brick Technologies, 2019-2021

Description: Handling complex medium and high load projects, participating in the development of projects with large structures, integrating payment systems, developing micro frontends, and creating web-based games.

FrontEnd: Vue, Vuex.

BackEnd: Laravel, Node.js, PHP, MVC.

DevOps: Docker, docker-compose

DB: PostgreSQL, MongoDB.

Fullstack developer

CoeLix, 2018-2019

Description: Handling complex medium and high load projects, involved in creating websites from scratch on WordPress, providing project support, optimizing site speed and SEO, and managing deployment of sites to production environments along with setting up other production configurations.

FrontEnd: HTML, CSS, SCSS, WebPack, Vue, Vuex, React.

BackEnd: PHP (Wordpress themes, plugins), Node.js, MVC.

DevOps: Gitlab CI/CD, CPanel.

DB: MySQL, MongoDB.

Mobile: React Native, Flutter, Cordova.

Front-end developer

TeaCrew, 2017-2018

Description: Creating adaptable landing pages, integrating payment systems, developing custom WordPress templates, and managing backend tasks.

FrontEnd: HTML, CSS, SCSS, WebPack, Vue.

BackEnd: Node.js, Java.

DevOps: ssh, deployment process.

DB: MySQL.

Skills

Back-end

Node.js
Nest.js
TypeScript
WS, WSS
RabbitMQ
Express
Fastify
Microservices
Prisma
C#, Python
GraphQL
Socket.io
Node.js clusters
PHP
Laravel

Front-end

JS (ES2020)
TypeScript
HTML, CSS, Flex, Grid
Vue
Vuex
Vue Router
React
Redux
WebPack
WS
PWA
Svelte

DB

PostgreSQL
Redis
MongoDB
ELK
MySQL

Mobile

Flutter
Cordova
Ionic

DevOps

AWS
Nginx
Apache
Github Actions
Gitlab CI/CD
Teamcity

Soft skills

Leadership
Communication skills
Critical thinking
Creativity
Adaptability
Problem-Solving
Conflict Resolution
